Q-TEK METAL CLEAN

Solvent For Removal of Film Coatings, Greases, and Oils, in Fluid or Wipe Form

Range of Applications

Q-TEK Metal Clean is designed to meet the demanding precision cleaning needs of high technology industries such as electronics, aerospace and automotive. It has proven to be especially effective in removing synthetic and natural oils, greases and other contaminants. Q-TEK Metal Clean is recommended as a suitable replacement for CFC-based cleaners in hand wipe, no rinse applications.

Product Features

- Powerful cleaner versatile with metals, plastics and glass
- Rapid drying leaving no residue
- Low surface tension allows for excellent wetting and penetration into restricted areas.
- Environment friendly with low odour and no ozone depleting substances
- Available and applicable in fluid or wipe form

Chemical Composition

Q-TEK Metal Clean is a blend of aliphatic paraffin and oxygenated hydrocarbons combined to give an appropriate balance of volatility and flash point. These ultra-pure materials provide superior solvency, good wetting, and dispersing characteristics. The safety ratings for Q-TEK Metal Clean are H=1, F=2, R=0.

Product Features

Flash Point: (TCC) 37°C (100°F)	Boiling Point: 309-350°F
Odour: Minimal to no odour	Appearance: Clear Liquid
Specific Gravity @60°F: 0.74-0.76	Vapour Pressure: 2.3mm Hg @ 68F
Vapour Density (Air=1): 5.14	

Safety Information

Q-TEK Metal Clean is a stable solution which should be stored in sealed containers. This product is not classed as a corrosive substance. It should be kept clear of open flame and ignition sources. The Material Safety Data Sheet provides additional safety information and should be consulted when using this product.

Availability

Q-TEK Metal Clean is available in a 500ml spray, tubs of pre-saturated wipes and 5 Litre pre-packaged containers.
